

TANK STRAPS: How To Thread Soft CAM Tank Straps

1

Insert the open end of the strap through the D-Ring.

2

Pass the strap up through the middle gap

3

Then pass the strap down through the gap closest to the D-Ring

4

Now tighten the strap against the tank with the BCD in place.

5

keep pressure on the CAM and slide the strap up through the last gap

6

Pull the strap tight to lock the tank in place. The Velcro strap holds the CAM in place.

TIPS

Wet the straps prior to slipping over tank as straps will stretch when wet preventing tank from slipping out during your dive.

Lift the BCD to ensure straps do not slip
